**A CONCORDANCE OF
THE NAMES IN
THE COLA
INSCRIPTIONS**

Vol. I and II: List of Names.

Vol. III: Index to Segments.

The present Concordance is an outcome of the project "A Statistical Study of Names in the Cola Tamil Inscriptions" which has been carried out by the authors since 1974 at the Institute for the Study of Languages and Cultures of Asia and Africa in Tokyo. Its programme has been to analyse the information given by the names and designations of the persons collected from the Cola Tamil inscriptions with the view of clarifying the administrative and social system of the period, which has remained obscure due to a lack of proper documentary materials. Although the detailed analysis of the information contained in this concordance still remains to be made in the future, a preliminary analysis which has already been made is appended to this publication.

The Concordance consists of two parts:

- 1) List of 9,590 Names with related information such as Title, Status, Role, etc.*
 - and 2) Index to all the Segments (20,835)*
- the Names arranged according to the Tamil and Grantha alphabetical order. This concordance is serviceable not only to historians but also to sociologists, linguists and scholars of other disciplines providing basic data for their studies.*

Rs. 105/- per set
